tamarin

capuchin monkey

squirrel monkey

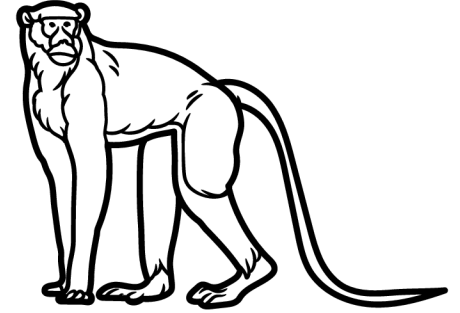

howler monkey

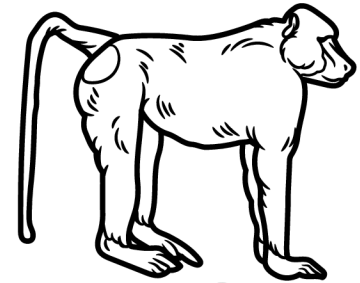

NOT TO SCALE

These monkeys live in Asia or Africa

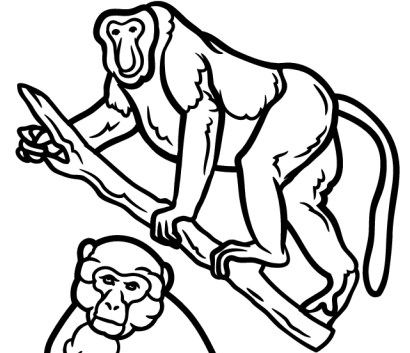

patas monkey

baboon

proboscis monkey

Barbary macaque

NOT TO SCALE

Did you
KNOW?

Almost all monkeys have tails. Except the Barbary macaque! No apes have tails, though. Tails are great for balance. And some monkeys – like capuchin and howler monkeys – have *prehensile* tails that can grasp hold of branches as they move through the trees.
