

# GET OUTSIDE!

## PHOTO SCAVENGER HUNT

- **Take only pictures.**
- **Respect wildlife.** For your safety and theirs, don't get close to wild animals. Try not to disturb animals that are busy doing their jobs. Hunting, eating, building homes, and caring for babies is important work!
- **Leave no trace.** Make as little impact as possible. Carry out your trash. Be considerate of other living things.

☐

**Item to find**

An insect with wings

**Challenge question**

Can you name the insect you found?

☐

A leaf with serrate (sharp, toothed) edges

The edge of a leaf has a special name: the margin. Can you name or describe some other types of leaf margins?

☐

Animal scat (poo) or tracks

Which type of animal left the signs you found?

☐

An animal's home (like a burrow, web, or nest)

Which animal do you think lives in the home you found?

☐

A millipede, earthworm, pill bug (slater), or beetle

What do these organisms have in common? What job do they do in ecosystems?

☐

An interesting plant

What are the characteristics of a plant?

☐

A mushroom or other fungus

How do underground fungi (like mycorrhizal fungi) help plants?

☐

An interesting rock

What does abiotic mean?

☐

Something that floats in water

Does an object float if it is more or less dense than water?

☐

Something you've never noticed or photographed before

What did you learn by spotting this item?
